Javier Maytorena

javier@maytorena.xyz | **portfolio.maytorena.xyz** | **linkedin/israel-maytorena**

Summary

Full-Stack Web Developer with over five years of experience in building complex projects and diverse web architectures.

Proficient in frontend and backend frameworks like React and Laravel, with extensive experience developing and optimizing REST APIs, CI/CD environments, and scalable solutions.

Technical Skills

- **Frontend Development**

  JavaScript, React, HTML, CSS, Sass, Less, UI frameworks (Chakra, Material UI, Bootstrap).

- **Backend Development**

  PHP, Laravel, Node.js (Express), MySQL, Nginx.

- **Testing**

  JTest, Cypress, Selenium.

- **CI/CD & DevOps**

  GitLab CI/CD, Docker, AWS, Linux.

- **Data Handling & Analysis**

  Pandas, Numpy, MySQL Server, Power BI.

Work Experience

cignuz(); | Remote | Fullstack developer | From August 2020 to Present

- Led both backend and frontend development across various projects, utilizing Laravel, Node.js with Express, React, and Next.js for building scalable web applications.

- Developed secure REST APIs implementing JWT authentication and ensuring seamless integration with third-party systems.

- Managed high-security data storage, implementing biometric validation through device integrations using Socket connections and webhooks, ensuring compliance with data protection requirements.

- Automated build and deployment processes with GitLab CI/CD and Docker, significantly reducing deployment times and minimizing manual intervention.

- Built responsive and accessible interfaces using React, Material UI, and CSS preprocessors (Sass). Integrated W-Aria for enhanced accessibility, creating user-friendly experiences across applications.

- Implemented automated testing with J-Test, Cypress and Selenium for frontend and backend systems, ensuring reliability and reducing production issues.

Wits MX | Guadalajara, México | Junior Developer | From April 2019 to August 2020

- Contributed to several full-stack projects, handling both frontend and backend tasks with React, CSS, HTML, Laravel, and Blade templates.

- Developed and maintained CRUD functionalities, focusing on connecting frontend interfaces with backend databases for effective data management and user interactions.

- Used Git for version control and collaborative development, adhering to structured workflows for smooth team collaboration.

- Conducted tests with various tools to ensure application reliability and minimize bugs, enhancing the quality and consistency of deployed projects.
